<b>“B.4 b</b>	<b>Description of any known trends affecting the Issuer and the industries in which it operates</b>	<p>During 2018, tax reform in the United States will further add to the upsurge in activity generated by investment recovery. ## RISK FACTORS

The first paragraph in section 1 entitled “*Factors relating to the Issuer and its Operations*” in the section entitled “*Risk factors*” on pages 75 and 76 of the Base Prospectus is hereby deleted and replaced with the following:

### “1 Factors Relating to the Issuer and its Operations

The risk factors relating to the Issuer and its operations which could adversely affect the Group’s profitability are set out on pages 83 to 111 of the 2017 DDR (as defined in “Documents Incorporated by Reference”) and are incorporated by reference into this Base Prospectus and include:

- **credit risks** - credit risk is the risk of financial loss relating to the failure of an obligor to honour its contractual obligations;
- **market and liquidity risks** - market risk is the risk related to earnings, which arises primarily from adverse movements of trading and non-trading market parameters and liquidity risk, which is also referred to as funding risk, is the inability of the Issuer to meet its obligations at an acceptable cost in a given currency and location;
- **operational risks** - operational risk corresponds to the risk of losses due to inadequate or failed internal processes (such internal processes including, without limitation, human resources and information systems), or due to external events (such external events including floods, fires, earthquakes or terrorist attacks), whether deliberate, accidental or natural occurrences;
- **insurance risks** - insurance risk is the risk that earnings may be negatively impacted due to mismatches between expected and actual claims and, depending on the insurance product, this risk is influenced by macroeconomic changes, changes in customer behaviour, changes in public health, pandemics and catastrophic events (such as earthquakes, industrial disasters or terrorism);
- **a downgrade of the rating assigned to BFCM could have a negative impact on the BFCM's liquidity and competitive position** - a rating downgrade could have a negative impact on BFCM's liquidity and competitive position, increase borrowing costs, limit access to the capital markets or trigger obligations under certain bilateral provisions in some derivatives contracts. The Group could also be forced to provide additional guarantees for certain market transactions;
- **non-compliance and reputational risks** - any damage to the Group's reputation might lead to a loss of business that could impact its earnings and financial position;
- **legal risks** - the Group and some of its employees could be involved in various lawsuits, which increase the risk of losses or of damage to the Group's reputation;
- **sovereign risks related to BFCM's net exposure on sovereign debt** - downgrades of sovereign ratings on which the Group is exposed could have a negative impact on the Group's refinancing conditions;
- **environmental risks** - environmental risks are analysed from the occurrence of natural disasters (100-year events, floods, earthquakes, pollution, etc.), their impact on the business and means of prevention and protection to be put in place;
- **risks related to regulatory requirements** - the Group is subject to extensive regulatory requirements and high-level supervision in each jurisdiction in which it operates;
- risk related to monetary, interest rate and other policies of central banks and regulatory authorities, low interest rates over an extended period of time having an impact on the revenue of the retail

banking activities and an increase of interest rates in the future having an impact on the value of the Group's portfolio because of the high level of loan stock at low interest rates contained in it;

- general changes in government or regulatory policy that may significantly influence investor decisions in particular markets in which the Issuer operates;
- general changes in regulatory requirement, for example, prudential rules relating to the capital adequacy framework;
- changes in the competition and pricing environment;
- changes in the financial reporting environment;
- expropriation, nationalisation or confiscation of assets and changes in legislation relating to foreign ownership;
- other unfavourable political, military or diplomatic developments producing social instability or legal uncertainty which in turn may affect demand for the Group's products and services;
- **a highly competitive French and global financial services market with innovative competition coming both from incumbent players and a steady stream of new market entrants** - if the Group is unable to respond to the competitive environment in France or in its other markets with attractive and profitable product and service offerings, it may lose market share in important areas of its business or incur losses on some or all of its activities;
- the Group's activities are highly concentrated in France, exposing the Group to risks linked to a potential downturn in French economic conditions;
- although the Group has a weak presence in Great Britain and the risks of contagion to its other activities remain relatively moderate, it is difficult to fully measure the future impacts of the unexpected decision of the British for the Brexit;
- **negative interest rate environment** - in a low-interest-rate environment, BFCM could find itself in a position where it would not be able to sufficiently reduce the interest rates on deposits to offset the fall in revenues on loans granted at lower interest rates; and
- **bail-in** - under the BRRD, the resolution authorities can impair BFCM's debt securities or convert them into capital once a resolution procedure has been instigated ("bail-in" tool) which could have a significant impact on the resources available to BFCM to redeem its securities."
